

### RGB Functions

#### **rgb(\$red, \$green, \$blue)**

Creates a Color from red, green, and blue values.

#### **rgba(\$red, \$green, \$blue, \$alpha)**

Creates a Color from red, green, blue, and alpha values.

#### **red(\$color)**

Gets the red component of a color.

#### **green(\$color)**

Gets the green component of a color.

#### **blue(\$color)**

Gets the blue component of a color.

#### **mix(\$color1, \$color2, [\$weight])**

Mixes two colors together.

### HSL Functions

#### **hsl(\$hue, \$saturation, \$lightness)**

Creates a Color from hue, saturation, and lightness values.

#### **hsla(\$hue, \$saturation, \$lightness, \$alpha)**

Creates a Color from hue, saturation, lightness, and alpha values.

#### **hue(\$color)**

Gets the hue component of a color.

#### **saturation(\$color)**

Gets the saturation component of a color.

#### **lightness(\$color)**

Gets the lightness component of a color.

#### **adjust-hue(\$color, \$degrees)**

Changes the hue of a color.

#### **lighten(\$color, \$amount)**

Makes a color lighter.

#### **darken(\$color, \$amount)**

Makes a color darker.

#### **saturate(\$color, \$amount)**

Makes a color more saturated.

#### **desaturate(\$color, \$amount)**

Makes a color less saturated.

#### **grayscale(\$color)**

Converts a color to grayscale.

#### **complement(\$color)**

Returns the complement of a color.

### HSL Functions (cont)

#### **invert(\$color)**

Returns the inverse of a color.

### Opacity Functions

#### **alpha(\$color) / opacity(\$color)**

Gets the alpha component (opacity) of a color.

#### **rgba(\$color, \$alpha)**

Changes the alpha component for a color.

#### **opacity(\$color, \$amount) / fade-in(\$color, \$amount)**

Makes a color more opaque.

#### **\*\*transparentize(\$color, \$amount) / fade-out(\$color, \$amount)**

Makes a color more transparent.

### Number Functions

#### percentage(\$number)

Converts a unitless number to a percentage.

#### round(\$number)

Rounds a number to the nearest whole number.

#### ceil(\$number)

Rounds a number up to the next whole number.

#### floor(\$number)

Rounds a number down to the previous whole number.

#### abs(\$number)

Returns the absolute value of a number.

#### min(\$numbers...)

Finds the minimum of several numbers.

#### max(\$numbers...)

Finds the maximum of several numbers.

#### random([\$limit])

Returns a random number.

### Introspection Functions

#### feature-exists(\$feature)

Returns whether a feature exists in the current Sass runtime.

#### variable-exists(\$name)

Returns whether a variable with the given name exists in the current scope.

#### global-variable-exists(\$name)

Returns whether a variable with the given name exists in the global scope.

#### function-exists(\$name)

Returns whether a function with the given name exists.

#### mixin-exists(\$name)

Returns whether a mixin with the given name exists.

#### inspect(\$value)

Returns the string representation of a value as it would be represented in Sass.

#### type-of(\$value)

Returns the type of a value.

#### unit(\$number)

Returns the unit(s) associated with a number.

#### unitless(\$number)

### Introspection Functions (cont)

Returns whether a number has units.

#### comparable(\$number1, \$number2)

Returns whether two numbers can be added, subtracted, or compared.

#### call(\$name, \$args...)

Dynamically calls a Sass function.

### Miscellaneous Functions

#### if(\$condition, \$if-true, \$if-false)

Returns one of two values, depending on whether or not \$condition is true.

#### unique-id()

Returns a unique CSS identifier.
